

CENTER FOR INNOVATION

2018-19 Year in Review

Takeaways:

- During the last 16 months, the Center has welcomed more than 15,000 guests and students for over 400 hosted events, programs and classes.
- The Center is working with key partners from the education, government, business and nonprofit sectors to support the future of work in our community and promote an entrepreneurial mindset across our local workforce.
- The Center recently completed an architecture design competition with Arcbazar, a crowdsourced architecture design platform hosted by Harvard Innovation Labs. We received 13 submissions from around the world and engaged over 250 local stakeholders in selecting the winning design to help inform the Center's second phase of development.
